# Editing the *Templates.*

Ai **Id**

Thank you for downloading our digital product. We're excited for you to use our template to streamline your process.

The files are provided in AI (Adobe Illustrator) and INDD (InDesign), allowing you to edit the template within these two programs. If you encounter any issues with the template, please don't hesitate to reach out to us via email at contact@abiconnick.co.uk
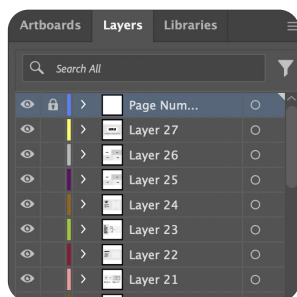

How to edit:

Simply open the template in Adobe Illustrator or Adobe InDesign. There's examples and descriptions on each page to help with explaining components to your client. Just adjust the colours, fonts, add in logos, photography and mockups and you're done!

Images aren't included within the template. Blocks are added where the images need to go.

Get commercial free images here:
Pexels and Unsplash.

In Adobe Illustator the layout of the pages are in single spreads.

Each page has its own dedicated layer so things don't get confusing and messy. You'll also find 'page numbers' has it's own layer too.

Fonts used in the template:

Poppins (google fonts)   **Roc Grotesk Compressed Bold** (adobe fonts)
